Develop API Client implementations starting from Swagger

The TMF Ecosystem APIs are being developed using Swagger.
The Swagger JSON can be found by selecting the proper API in the Open API Table (archive) and by clicking on the Swagger Icon.

API Name	API Specification	Postman Collection	Swagger Swagger_UI	Reference Implementation Code	Download Specification
Trouble Ticket API Provides a standardized client interface to Trouble Ticket Management Systems for creating, tracking and managing trouble tickets among partners as a result of an issue or problem identified by a customer or another system. Examples of Trouble Ticket API clients include CRM applications, network management or fault management systems, or other trouble ticket management systems (e.g. B2B).	🔗	🖊	{···} {···}	⚫	🔻

The downloaded JSON can then be imported into the Swagger Editor http://editor.swagger.io/#/.
You can generate different Client implementation code by selecting the proper entry for example Java or Python from the Generate Client Menu.
