

Intelligence to Modernize Operations

AI-Driven
Intelligent Operations towards 5G

Based on AI and Big Data, and Huawei's extensive experience on 160+ networks, AUTIN combines Automation and Intelligence to not only improve network operation quality and efficiency, but also reduce O&M costs and increase TCO saving to transform into digital service providers.

AUTIN, powered by the intelligent operation platform OWS, offers Mobile Network Operations-HEB & Leased Line Operations and NTV & 5G Operations.

Through the Operation Consulting and SaaS model, AUTIN also provides the digital workforce with skillset transformation and an open collaborative eco-system. Driving operations towards zero outage, zero intervention and zero risk.
