

Collaboration Environment and Tooling

To support project teams in Collaboration we have a set of tools available that enable creation and publishing of deliverables. We are currently developing the environment and adding tools to provide a better experience for project teams.

The environment consists of the following commercial tools:

Community (Discussions)

Confluence Here is an excellent article on the why Confluence is not just a wiki, but the perfect tool for online collaboration: <http://blogs.atlassian.com/2014/07/collaborate-team-using-wiki/>

JIRA

Github
