TMF677 Usage Consumption API REST Specification R18.5.0

This API should allow to view in real-time the balance of the various buckets (SMS, Voice, Data for example) that an user consumes with each of his devices and the usages done out of the bucket. An usage report retrieve the data related to these balances. This API should also allow to perform a direct topup on the balance of a prepaid bucket with voucher references or with a given credit value after a payment done by a credit card or with a credit value transfered.

Latest Update: TM Forum Release 18.5.0	Status: Member Evaluation
Version: 4.0	IPR Mode: RAND
