TMF638 Service Inventory API REST Specification R18.5.0

The intent of this API is to provide a consistent/standardized mechanism to query and manipulate the Service inventory. This API allows the following operations:

- Retrieve a list of Service stored in a server filtered by a given criteria
- Retrieve a specific Service in the inventory

Latest Update: TM Forum Release 18.5.0	**Status: Member Evaluation**
Version: 4.0	**IPR Mode: RAND**
