

TMF674 Geographic Site Management API User Guide v4.0

Covers the operations to manage (create, read, delete) sites that can be associated with a customer, account, service delivery or other entities. This API defines a Site as a convenience class that allows easy reference to places important to other entities, where a geographic place is an entity that can answer the question "where?"

Release Status: Pre-production	Approval Status: Team Approved	
Version: 4.0.0	IPR Mode: RAND
