

# TMF678 Customer Bill Management API User Guide v4.0

The Customer Bill Management API provides a standardized client interface to a Customer Bill management system.

This API allows to find and retrieve one or several customer bills (also called invoices) produced for a customer. It provides also operations to find and retrieve the details of applied customer billing rates presented on a customer bill.

Finally, this API allows to request in real-time a customer bill creation and to manage this request.

<b>Release Status: Pre-production</b>	<b>Approval Status: Team Approved</b>	
<b>Version: 4.0.0</b>	<b>IPR Mode: RAND</b>
