

# TMF635B Usage Management API Conformance Profile v4.0

This document describes the API Conformance for the Usage API.

The Usage API provides a standardized mechanism for usage management such as the creation, update, retrieval, import and export of a collection of usages. A usage is an occurrence of employing a Product, Service or Resource for its intended purpose which is of interest to the business and can have charges applied to it.

This document identifies the parameters that must be included in a request related to the operations above as well as the parameters expected in the response.

<b>Release Status: Pre-production</b>	<b>Approval Status: Team Approved</b>	
<b>Version: 4.0.0</b>	<b>IPR Mode: RAND</b>
