

Catalyst submissions and knowledge base

Submit a Catalyst Project proposal

Do you have an idea for a new Catalyst project? Great!

If you have already [registered](#) with the TM Forum, you only have two easy steps to make the initial submission.

The first step is to give the Catalyst project a working name, a short summary, and define the Catalyst Type.

In the second step, you define the details of the Catalyst project, and you can share the draft submission with your Catalyst project team members.

Once completed, a private proposal form will be created, which you can invite your team to, and, once completed, submit it for formal review.
