

TMF653B Service Test Management API Conformance Profile v4.1.0

The Service Test API provides a standardized mechanism for placing a service test with all of the necessary test parameters. The API consists of a simple set of operations that interact with CRM/Service Management systems in a consistent manner. A service test is a procedure intended to check the quality, performance, or reliability of a service.

Team Approved Date: 28-May-2021
