

Collaboration Process, Guidance and Governance

Welcome to the TM Forum Labs - Member projects page.

This page is designed to give you the tools, documents, and templates that you need to collaborate with us and the industry successfully.

All the TM Forum guides can be found in the page tree to the left.

Accelerate R&D, build your network, and find your channel to market through agile working with members globally. At TM Forum, the art and act of collaboration are one of the underlying tenets of our organization and one of the significant benefits of membership.

- Inside TM Forum's 'Member project' program, members and industry leaders share ideas and ask questions of one another in communities.
- Form smaller project teams to create standards, best practices, and APIs.
- Members of TM Forum benefit from sharing their passions, intellectual capital, and experience on project teams. These attributes result in the creation of industry standards, best practices, tools, interfaces, guidebooks, and other deliverables that are of great value to the TM Forum membership and the health and welfare of the industry.
- Individuals and companies who get involved in our collaboration program provide their expertise, requirements, and perspective to help shape and define the standards adopted by the rest of the industry.
- All programs and initiatives underway at TM Forum are designed to help companies worldwide improve operational agility while reducing costs and risk, engage customers, expand market share and drive revenue growth through new services.
