

Reviewing and Commenting

Part of the project cycle is to allow members of the project to review work in progress and provide comments and feedback. Confluence allows this to happen in a very fluid way as every page has the ability to record comments.

To comment on a page:

- Scroll to the Comments section at the bottom of the page
- Click in the box underneath the page content which has "Write a Comment" in it
- The box changes to a text editor so you can apply formatting, upload images etc :

A screenshot of the Confluence comment editor interface. It features a small profile picture icon on the left. The main area is a text editor with a toolbar at the top containing various formatting options like bold, italic, underline, text color, background color, bulleted list, numbered list, link, unlink, table, and more. Below the toolbar is a large text input area with the placeholder text "Here is my comment text against this page". At the bottom right of the editor are three buttons: "Preview", "Save" (highlighted in orange), and "Cancel".

- Once you have finished your comment click Save
- Your Comment now appears in the page and both the page author and anyone watching the page will be notified
