What is Feedback?

Feedback is the term we use for any kind of change, input or feature request (Change Requests, Review Comments, Feature Requests etc) that any member may wish to make on a deliverable. Any individual in any member company may submit feedback against a deliverable once it has been [Team Approved](#) and made available.

Any Feedback submitted by an individual must first be approved by the submitter's company IPR representative. This may happen automatically or on a case by case basis. The feedback is then routed to the project team that created the deliverable for their consideration. If deemed appropriate by the team they may wish to include the feedback in the final version of the deliverable.
