

# SID "Golden Nuggets"

Howdy, teammates...and welcome to the SID "Golden Nuggets" Wiki. Many of the Community Posts have involved different approaches to modeling, implementing, and such regarding the SID. What would be great is if members involved in a thread could capture the "golden nuggets" from the thread and post them here under a page for each topic. This doesn't take away the possibility of submitting the nugget as a contribution to the SID, but does provide an alternative way to share outside of the contribution process.

List of Nuggets:

- [Implementing Characteristics nugget](#)
- [patterns1 nugget](#)
- [ProductOffering/ProductOfferingPrice nugget](#)
- [RSM tips & tricks](#)
- [Using the SID](#)
- [About the role and importance of the Service Domain](#)
