Open Hack TM Forum Live Nice 2017

Open Hack is part of an overarching API Strategy for enabling interoperability and portability across the globe

TM Forum Open Hack brings together architects, enterprise developers, designers, data scientists with an ecosystem platform where open data, Open APIs and micro services are leveraged to quickly mash together new services to solve challenges and partnering opportunities posed by cities and operators across the globe.

OPEN HACK PROVIDES a BLUEPRINT FOR BUILDING DIGITAL ECOSYSTEMS and PLATFORMS

Industry agreed Forum Open APIs, Architectures and Data Models are at the heart of this initiative whereby simple business management APIs are used to streamline operations and rapidly design and mashup enterprise grade solutions.

Teams will be challanged to create new solutions in the IoT/Smart City, Customer Centricity and Network Service areas using the technology provided by the hosts.

Expert led training on these industry assets is a key feature of the event.
