customer API Salesforce Mapping

/customerManagement/customer/{ID}

Supporetd Methods

GET, PATCH, PUT

Description

The customer service is primarily mapped to the Salesforce Contact objects. The service can either be used to retrieved a collection or a specific record (using {ID} at the end of the service). This service is partially supported (i.e. only fields and sub entities that conform to Salesforce model are mapped).

RESOURCE	ELEMENT	SALESFORCE FIELD	OTB MAPPING
{
