TMF645 Service Qualification API REST Specification R18.0.1

Service Qualification API is one of Pre-Ordering Management API Family. Service Qualification API goal is to provide service technical eligibility in the context of the interaction. This API allows to :

- request a specific service eligibility,
- look for service eligibles (or not) from a service category,
- look for service eligibles (or not) from a service specification and characteristics.

Because the API allows describing service from the inventory, it is also possible to use it to retrieve service available to complete existing service.

Latest Update: TM Forum Release 18.0.1	**Status: TM Forum Approved**	
Version: 3.0.2	**IPR Mode: RAND**
